Text: Intermediate Algebra for College Students, by: Robert Blitzer, $7^{\text {th }}$ edition, Pearson Publishing
Homework: Will be assigned, and you are responsible to do the homework. Homework will be randomly collected. Homework will not be graded.

Tests: Plan on giving 3 tests. The lowest graded test will be dropped. The tests will be $40 \%$ of your grade ( $20 \%$ each). Absolutely no make ups will be given. Test dates may/will change. It will be announced in class. It is your responsibility to note the date changes and be present.

Attendance: I will take attendance. If you are late : 10 minutes or more to the class or you leave 10 minutes or more earlier than class is dismissed, you will be considered absent.

Midterm: Plan on giving one midterm. It is worth $25 \%$ of your grade. Absolutely no make ups will be given. Midterm date may/will change. It will be announced in class. It is your responsibility to note the date changes and be present. If you miss the midterm, the final test score will also be counted for midterm score.

Final: One final will be given. Absolutely no make ups will be given. If you have a conflict for final exam date with another class, you must inform me within the first 4 weeks of classes. No exceptions. Final will be $35 \%$ of your grade.

Make ups: Absolutely no make ups will be given.
Scaling/Curving: The scores you make in tests and final mathematically decides your grade. No scaling/curving will be done.
Cheating: Will NOT be tolerated. It will result in an " $F$ " for that test/midterm/final and may lead to an " $F$ " for the course.
Grades: $A: 90 \%$ to $100 \% ; B+: 87 \%$ to $89.99 \% ; B: 83 \%$ to $86.99 \% ; B-: 30 \%$ to $82.99 \% ; C+: 77 \%$ to $79.99 \% ; C: 77 \%$ to $70 \% ; D: 60 \%$ to $70 \%$, $\mathrm{F}: 0 \%$ to $59.99 \%$.

Final Exam: It is student's responsibility to check ard verify date and time. The date and time may change as the quarter progresses.

Drop Policy: It is the responsibility of the student to drop the class after he/she attends the first session.
Course Outcome: Evaluate real-world situations; and distinguish between and apply linear and quadratic function models appropriately. Analyze, interpret, and communicate results of linear and quadratic models in a logical manner from four points of view - visual, formula, numerical, and written. Demonstrate an appreciation and awareness of applications in their daily lives.
