

MATH D002B
Linear Algebra
Spring 2025
TR 1:30-3:45 MLC 108

Instructor: Fatemeh Yarahmadi

E-mail: arahmadifatemeh@fhda.edu

- The best way to contact me is through my email, arahmadifatemeh@fhda.edu
- My office is located in S33N

Communication Plan

- Communication between instructor and student is very important. The best way to contact me is through Canvas and email. I will respond within 24 - 48 hours on weekdays, and on Monday for emails sent over the weekend. If I don't respond in that timeframe, please email me again.
- I always send out messages and announcements through Canvas. I would recommend checking your Canvas inbox daily, and if you can, download the Canvas app on your phone. I am very approachable so if you have any questions, please ask!

Textbook & Required Materials:

Text: OER Linear Algebra: A First Course

Computer/smartphone to complete online homework assignments, submit activities on Canvas.

Prerequisite:

Mathematics 1D with a grade of C or better.

Advisory: English Writing 211 and Reading 211 (or Language Arts 211), or English as a Second Language 272 and 273.

Attendance:

You are required to show up to class on time. Attendance will be taken every lecture at the end of class. A major part of the class involves participation, discussing assignments and problems with your classmates. You are expected to meet all deadlines for homework, quizzes, and discussions. We are learning a lot of different concepts that build on one another and it is very difficult to catch up if you fall behind. Time management is critical in a math course.

Notebook

I recommend that you work out each homework problem on paper in a notebook. Even though you won't be handing in problems (unless announced), I expect that you write out the solution to each problem in your notebook. I believe the best way to prepare for a test is to practice the skills that you will demonstrate during the test. Practice solving each problem in a clear, logical, and methodical way and you will earn more points on your test. This will also help me whenever you come to me with questions, because it allows me to see your work and offer helpful suggestions suited to your questions.

Canvas:

All class content, assignments and announcements will be on Canvas, which you can access through MyPortal. The course will be divided into weekly modules in Canvas.

Group Activity:

There will be required group activities. Even though the problems will be discussed in group, write up your own solutions independently.

- **Every member** of the group will be taking a role.
- Your name and your role should be written at the top of the first page.
- Work must be NEAT and ORGANIZED. Do problems IN ORDER.
- It is important for you to SHOW YOUR WORK! You are graded on the work you show to get the final answer, not just the final answer. Be sure to show your “scratch work” that goes with the problem.

Discussions: There will be discussion topics posted throughout the term. The deadline for responding to the topic will be indicated when the assignment is posted. You may not respond to the discussion once the deadline has passed.

Homework:

Written sets for submission: During the term, I will send out homework and group activities sets to be discussed, written up, and submitted on Canvas. Homework and group activities is essential in any math class. You cannot expect to pass the class without putting consistent effort into homework and group activities. Show all work and explain any reasoning. You may not submit your assignments once the deadline has passed.

HW Guidelines:

The process of solving homework problems reflected in step-by-step solutions. The following are some specific criteria:

Guidelines for homework:

- Your name, class, and section number should be written at the top of the first page.
- Work must be NEAT and ORGANIZED. Write the questions (problems) IN ORDER. Following the format displayed on Canvas.
- It is important for you to SHOW YOUR WORK! You are graded on the work you show to get the final answer, not just the final answer. Be sure to show your “scratch work” that goes with the problem. All work you submit must be written up individually in your own words, and you shouldn't ever submit work that you wouldn't be comfortable explaining clearly to another student or to the instructor.
- Do your work underneath the assigned problem then circle your final answer.
- At the end of each homework assignment, write a brief “Chat” paragraph
 - A key component in learning is thinking about how and what you are learning. What are you doing that is working? What areas could you improve upon? What comes easily for you? Is there a pattern in your homework? At the end of each homework assignment, write a very

brief paragraph about what you learned, what you feel you need to review, and any thoughts or feelings you have about the math you're doing. This is also a great opportunity for you to communicate with your instructor! There are no "right" answers. Be honest and use this as a learning process.

- Submit pdf file of your homework on Canvas

Projects: Projects will be assigned throughout the term. Project due dates are indicated on Canvas. You may not submit your assignments once the deadline has passed.

Exam Reviews: There will be an exam review assigned before each exam. The purpose of the review is to aid the student in studying for the exams. You may not submit your assignments once the deadline has passed.

Midterm Exams: There will be three midterm exams.

Exam 1 on April 24, Exam 2 on May 15, Exam 3 on June 5.

Each midterm exam will focus the material covered since the previous exam. More details on exam dates and procedures can be found in Canvas. You may not submit your assignments once the deadline has passed.

Final Exam: The final exam is on June 24. The final exam will cover all material from throughout the term. More details on the final exam will be available on Canvas.

No makeups for the final can be provided. The final grade cannot be dropped.

Sample Rubrics that I follow:

(10 points) Calculate the following limit or justify why it does not exist. $\lim_{x \rightarrow 1} \frac{1-x}{1-\sqrt{x}}$

SOLUTION:

$$\begin{aligned}\lim_{x \rightarrow 1} \frac{1-x}{1-\sqrt{x}} &= \lim_{x \rightarrow 1} \frac{1-x}{1-\sqrt{x}} \cdot \frac{1+\sqrt{x}}{1+\sqrt{x}} \\ &= \lim_{x \rightarrow 1} \frac{(1-x)(1+\sqrt{x})}{1-x} \\ &= \lim_{x \rightarrow 1} (1+\sqrt{x}) = 2\end{aligned}$$

GRADING RUBRIC:

0 points – If the student uses L'Hopital's Rule

2 points – If the student got a $\frac{0}{0}$ limit by plugging in $x = 1$, but did nothing else

4 points – If the student knew to multiply numerator and denominator by $1 + \sqrt{x}$, but did not do it correctly; this includes not canceling $\frac{1-x}{1-x}$

7 points – If the student properly rationalized and got to $\lim_{x \rightarrow 1} (1 + \sqrt{x})$, but did not evaluate the limit correctly

10 points – If the student properly rationalized and got the correct limit

-3 points – If the student did not write $\lim_{x \rightarrow 1}$ anywhere

Grading Policy:

Homework, Group Activities, and Discussion	200 pts (25%)
Projects and Presentation	100 pts (12.5%)
Midterm Reviews/ Midterms	300 pts (37.5%)
Final	200 pts (25%)
Total	800 pts

A	100%	to 94.5%
A-	< 94.5%	to 89.5%
B+	< 89.5%	to 86.5%
B	< 86.5%	to 83.5%
B-	< 83.5%	to 79.5%
C+	< 79.5%	to 74.5%
C	< 74.5%	to 69.5%
D+	< 69.5%	to 66.5%
D	< 66.5%	to 63.5%
D-	< 63.5%	to 59.5%
F	< 59.5%	to 0%

Important Dates and Deadlines: <http://www.deanza.edu/calendar/dates-and-deadlines.html>

De Anza Final exams schedule: <https://www.deanza.edu/calendar/final-exams.html>

For detailed information on Homework, Quizzes, Projects, Discussion please log into your Canvas course page.

Grade Changes

Grade changes are made only for clerical errors. I will not change grades for any other reason.

Important Notes:

There will be regular online homework, quizzes. You will have a limited amount of time to complete the quizzes, homework, and discussions.

Any late submissions are penalized at a rate of 10% per day.

No makeup quizzes will be given, even if the absence is excused. If you miss an quiz, you will receive a 0% on it.

Dropping

Students will not be automatically dropped for non-attendance. Although I do reserve the right to drop students for non-attendance, it is the student's responsibility to officially drop or withdraw from the course – if you fail to do so and your name appears on the final roster, you will receive an F for the term. Do not assume that I will drop you if you stop coming to class.

Academic Integrity:

All students are expected to exercise high levels of academic integrity throughout the quarter. You are encouraged to work together but you are expected to write up your answers independently. Any instances of cheating or plagiarism will result in disciplinary action, including getting a '0' on the assignment and report to the PSME dean, which may lead to dismissal from the class or the college

Student Honesty Policy:

"Students are expected to exercise academic honesty and integrity. Violations such as cheating and plagiarism will result in disciplinary action which may include recommendation for dismissal."

Electronic Devices on Exam:

Electronic devices such as phones, ipads, calculators (electronic, mechanical, or any other type), and other devices, are also not allowed on exams. Exams are not intended to test your ability to find the answer by any means necessary. Rather, exams are supposed to test your understanding of the course material, which you will need in order to use math correctly in subsequent courses and in the real world.

Disabled Services:

Students who have been found to be eligible for accommodations by Disability Support Services (DSS), please follow up to ensure that your accommodations have been authorized for the current quarter. If you are not registered with DSS and need accommodations, please go to <http://www.deanza.edu/dss>.

This syllabus is subject to change at the instructor's discretion. Changes will be announced in class and on Canvas.

Recipe for Success:

- If you ever have any questions, Email me! You are welcome to send email to me whenever you need help!
- Visit the Online Tutoring Center.
- Form an online study group.
- Watch all lectures, participate in every discussion, and complete every homework assignment.
- Read the sections to be discussed in class prior to the lecture

Topics

Introduction to Systems of Linear Equations
Gaussian Elimination and Gauss-Jordan Elimination
Applications of Systems of Linear Equations
Operations with Matrices
Properties of Matrix Operations
The Inverse of a Matrix
Elementary Matrices
Applications of Matrix Operations
The Determinant of a Matrix
Determinants and Elementary Operations
Properties of Determinants
Applications of Determinants
Vectors in n -space
Vector Spaces
Subspaces of Vector Spaces
Spanning Sets and Linear Independence
Basis and Dimension 186
Rank of a Matrix and Systems of Linear Equations
Coordinates and Change of Basis
Inner Product Spaces
Orthonormal Bases: Gram-Schmidt Process
Introduction to Linear Transformations
The Kernel and Range of a Linear Transformation
Matrices for Linear Transformations
Eigenvalues and Eigenvectors
Diagonalization
Symmetric Matrices and Orthogonal Diagonalization
Applications

Tentative Schedule

WEEK	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	Friday
1		Ch 1		Ch 1	
2		Ch 2		Ch 2	
3		Ch 3		Ch 3	
4		Ch 4		Ch 4	
5		Ch 4		Ch 5	
6		Ch 5		Ch 5	
7		Ch 6		Ch 6	
8		Ch 6		Ch 7	
9		Ch 7		Ch 7	
10		Ch 8		Ch 8	
11		Final Review		Final Review Project Presentation	
12		Final Exam			

Student Learning Outcome(s):

- Construct and evaluate linear systems/models to solve application problems.
- Solve problems by deciding upon and applying appropriate algorithms/concepts from linear algebra.
- Apply theoretical principles of linear algebra to define properties of linear transformations, matrices and vector spaces.

Office Hours:

T,TH 12:00 PM - 1:00 PM
M 10:00 AM - 12:00 PM
